

Biozentrums-Kolloquium

Biozentrum, Hörsaal A101, 17 Uhr c.t.

Julius-Maximilians-
**UNIVERSITÄT
WÜRZBURG**

- 18.10.2017** **John T. Lis**, Cornell University
How specific factors collaborate to regulate distinct steps of the transcription cycle
- 29.11.2017** **Henrik Oster**, Universität Lübeck
Physico-Medica Lecture Interaction between the endocrine and the circadian clock system in mammals
- 06.12.2017** **Eric Warrant**, Lund University
How the Earth's magnetic field and visual landmarks steer navigation in the Australian Bogong moth, a nocturnal long-distance migrant
- 10.01.2018** **Owen Sansom**, Beatson Institute, Glasgow,
Physico-Medica Lecture Using GEMM models to stratify colon cancer therapy
- 24.01.2018** **Alexander Gottschalk**, Universität Frankfurt
Optogenetic analysis of neuropeptide signaling in *Caenorhabditis elegans* locomotion
- 31.01.2018** **Stefan Raunser**, MPI Dortmund
The power of cryo-EM to elucidate biological mechanisms
