

CV OF THORSTEN VIKTOR FEICHTNER

Birth: February 4th 1981; Kötzing
Position: Habilitation student; senior PostDoc
Work address: Nano-Optics and Bio-Photonics group,
Experimental Physics 5, University of Würzburg,
Am Hubland, 97074 Würzburg, Germany
Family status: married;
1 daughter (*05.02.2014), 1 son (*23.06.2022)
Email: thorsten.feichtner@tuep-texte.de
Website: <https://www.physik.uni-wuerzburg.de/ep5/team/senior-scientists-postdocs/dr-thorsten-feichtner/>
Identifier: OrcID: 0000-0002-0605-6481; ResearchID: J-4089-2012
LinkedIn and Xing Profile available

A. Working/Research experience

01.03.2022 – today

Julius-Maximilians-Universität Würzburg: habilitation student focusing on linear and non-linear light-matter coupling, and developing a microfluidic photo-electrochemistry device with live SERS capabilities

01.09.2020 – 28.02.2022

MSCA Individual Fellowship “PoSHGOAT” - Potential-dependent Second-Harmonic Generation in Optical Antennas measured Time-resolved. Research project for 18 month at the “Politecnico di Milano”

06.02.19 – 31.08.2020

Managing director (MD) of the German Cluster of Excellence “ct.qmat – Complexity and Topology in Quantum Matter”; In parallel research on the VW “Experiment” grant “PECo – Plasmo-Electric Converter”

As MD I had to build the administration of the Cluster from scratch, from e.g. establishing the internal granting scheme to the online representation (www.ctqmat.de).

01.01.17 – 05.02.19

Julius-Maximilians-Universität Würzburg: PostDoc position at the nano optics und biophotonics group of Prof. Bert Hecht, Experimental Physics 5, Germany

Large research topic “Complex plasmonic devices for enhanced light matter interaction”: optimal focusing, coupling to chiral light, fundamentals of the plasmo-electric effect.

01.01.15 – 31.12.16

Helmholtz-Zentrum Berlin für Energie und Materialien GmbH: PostDoc position at the ‘Institute of Nano-Architectures for Energy Conversion’ of Prof. Silke Christiansen, Germany.

Helping with setting up a new institute: designing a strategy for new institute “Nano-Architectures for energy conversion”, strategy for the “ZEISS lab@location” and HEMF (Helmholtz-Energy materials foundry).

Responsible for building up a commercial TERS setup, as well as for AFM, AFM-SEM and DekTak. Engaged in establishing an infrastructure for numerical modelling. Fabricating nano structures by means of He-/Ne-/Ga-Ion FIB. Coordination of the DFG SPP 1839 “Tailored Disorder”.

01.06.13 – 31.12.14

Max-Planck-Institute for the Science of Light: PostDoc position at the TDSU “Photonic Nanostructures” of Prof. Silke Christiansen, Erlangen, Germany

Establishing a project on solar fuel generation. FIB structuring of metallic nano structures. Teaching numerical software. Working on detailed analysis of monocrystalline gold flakes. Writing and coordinating the DFG SPP 1839 “Tailored Disorder”.

01.09.08 – 30.04.13

Julius-Maximilians-Universität Würzburg: PhD position at the nano optics und biophotonics group of Prof. Bert Hecht, Experimental Physics 5, Germany

Research on the DFG project “Applications and capabilities of optical antennas”: theoretical description of the fundamentals in light-matter interaction, FDTD simulations for verification and fabrication with FIB. Measuring with SEM, AFM, (self-built) confocal microscopy and white-light scattering. Developing an evolutionary algorithm for numerical optimization of optical antennas.

24.10.06 – 06.06.08

Institut für Gravitationsforschung (IGF) of the „Göde Wissenschaftsstiftung“: research assistant during studies, private institute Waldschaff, Germany (additional for 6 month in 2013)

Several small projects on solar cells, magnet stability and gravitation theories (dismantling off-beat theories, writing a wiki). Helping to build an EMC cabin.

01.10.00 – 30.06.01

Military service: radar mechanics

B. Education

01.10.08 – 23.11.16

PhD-Dissertation in Physics; Title: “Beyond the dipolar optical antenna” (magna cum laude = 1.0); Defense date 23.11.16 (magna cum laude = 1.0); Supervisor Prof. Dr. Bert Hecht, Experimentelle Physik 5, Julius-Maximilians-Universität Würzburg, Germany

01.09.09 – 12.02.12

Diploma study at correspondence course for specialist journalism; finished as “Fachjournalist(FJS)”

01.05.07 – 31.03.08

Diploma (equals to M.Sc., mark: 1.0) in Physics, “FDTD-simulations of optical antennas”, Julius-Maximilians-Universität Würzburg, Germany

01.10.2001 – 30.04.2007: Studies in Physics at the Julius-Maximilians-University Würzburg

10.09.1991 – 30.06.2000: Secondary school with focus on natural sciences finishing with Abitur (mark: 2.2)

15.09.1987 – 24.07.1991: Primary school

G. Additional qualification

Courses in “Consulting in academic teaching”, “Management of personnel”, “The free speech”, “Effective teaching – self management”, Basics of Project Management @ HZB”; Additional soft skill courses “unconscious Bias”, “problem solving group discussions” @ JMUWue

Fulbright-Cottrell Second Junior Faculty Professional Development Workshop

Description from the website: The workshop offers training for junior group leaders in Germany on how to best implement evidence-based pedagogies, integrate research and teaching, use new strategies for communicating science to the public, and develop skills in time management, leadership, mentoring students, and networking.

Computer graphics for scientific topics: (see: <https://de.pinterest.com/tfeichtner/scientific-visualization/>)

Nov. 2017- Oct. 2019: Vice-chairman of “Archipelkampagne e.V.”

April 2009 – April 2012: Youth trainer, youth leader and public relations responsible in the chess club “SK 1865 Würzburg e.V.”

Juni – Oktober 2009: Editor in Chief of the student’s council magazine of the physics faculty in JMU Würzburg.

October 2000 – July 2001: basic military service; duty as radar machinist

1998 – 2000: Pupils leader of the school’s astronomy workgroup and editor in Chief of the pupil’s magazine “Zenit” at the Walther-Rathenau-Gymnasium in Schweinfurt.

C. Scientific Merits

- a) 20 publications in peer-reviewed journals + 1 review article nearly submitted (See section F for details)
- b) h-index = 14 (google scholar), 13 (researchgate), 12 (web of science)
- c) 20+ talks at conferences, seminars (4 invited colloquiums presentation)
- d) 15+ Posters at conferences and seminars
- e) 1st poster award 491. WEH-Seminar - Quantum and Nano Plasmonics
- f) 3rd poster award 546. WEH-Seminar - Light in disordered photonic media
- g) Third party funding (>50k€):
 - a. VolkswagenStiftung “Plasmo-electric Converter (PECo; Az: 95869) since April 2019
 - b. MSCA IF “PoSHGOAT” (Project 837928) started Sept. 1st 2020
 - c. HEMF (https://www.helmholtz-berlin.de/projects/hemf/index_en.html – organigram by me; final proposal contained 9 figures, all (c) Thorsten Feichtner)
- h) Part of the COST-action MP1302 NanoSpectroscopy (finished) and CA19140 fit4nano (finished)
- i) Guest contract with the Helmholtz-Zentrum Berlin from 2017-2019

D. Committees and Reviewer Responsibilities

- Reviewer and Rapporteur for MSCA IF proposals (2022 and 2023 respectively)
- Reviewer for Advanced Optical Materials, Optics Express, Journal of Microscopy and Applied Sciences, Annalen der Physik, Laser and Photonics Reviews, ...
- Coordination of the DFG SPP 1839 “Tailored Disorder” (2015 – 16): Setting up communication channels and being the main contact person in all stages, organization of three scientific meetings, chairing an elevator pitch session.
- Sub-group-leader ‘Nano-Optics’ within the TDSU Photonic Nanostructures (2013 – 14)
- Scientific advisory council member of the “Institut für Gravitationsforschung” (IGF)

F. Selected list of talks given

Talks [in blue](#) are not purely academic.

1. *Impedance matching and emission properties of optical antennas in a nanophotonic circuit*; 20.03.2009; DPG Spring Meeting
2. *Nanoantennae on AFM-Tips for enhanced fluorescence detection*; 09.10.2010; WNCO-Workshop, Niederstetten
3. [Kleiner als das Licht erlaubt! – Wie man mit Nanoantennen genauer hinschaut](#); 27.01.2011; Science Slam Würzburg
4. *Atomically flat single-crystalline gold nanostructures for plasmonic nanocircuitry*; 16.03.2011; DPG Spring Meeting
5. *An optical nanoantenna on an AFM-tip for scanning single emitter spectroscopy*; 14.07.2011; 488. WE Heraeus Seminar Single Molecule Spectroscopy: Current Status and Perspectives
6. *Evolutionary optimization of plasmonic nano antennas*; 27.03.2012; DPG Spring Meeting
7. *Evolution, Reciprocity and coupling of single emitters to plasmonic nano antennas*; 11.03.2013; DPG Spring Meeting
8. *An integrated device for carbon reduction from ambient air*; 13.05.2014; 562 WE Heraeus-Seminar "From Sunlight to Fuels"
9. *Nanostructuring for advanced photonic applications*; 03.06.2014; invited talk at University of Chemnitz at group seminar
10. *New details about monocrystalline goldflakes for plasmonic applications*; 17.03.2015; DPG Spring Meeting
11. *Evolutionary optimization of plasmonic geometries - Heuristic solutions to complex nano-optical problems*; 03.03.2016; Matheon Workshop - 9th Annual Meeting "Photonic Devices"
12. *Double modematching for metal nanoantennas*; 20.03.2017; DPG Spring Meeting
13. *Multiple Mode Matching for Optical Antennas*; 08.02.2018; Matheon Workshop 11th annual meeting "Photonic Devices"
14. *Modematching for helical plasmonic resonators*; 13.03.2018; DPG Spring Meeting
15. *From evolution to mode-matching: novel tools to optimize plasmonic devices*; 13.06.2018; invited talk at the Physics department of the Politecnico di Milano
16. *Double Mode Matching for Plasmonic Resonators*; 04.07.2018; 6. Plasmonica Florenz
17. [Streuung durch Physik – Lebenswege vor und nach dem Studium](#); 29.06.2019; Festvortrag Absolventenfeier Physik 2019
18. *An ambient condition nanoscale electrochemic device with direct optical antenna feedback*; 13.02.2020; TNTN 2020, Berlin
19. [Rot + Rot = Violett](#); 06.11.2020; Science Slam "Röntgen Anniversary"
20. [Quanten-Politik](#); Klimaslam Würzburg 2022
21. *Double resonant, monocrystalline plasmonic gratings evolutionary optimized for enhanced SERS sensing*; 2023 DPG Spring Meeting
22. *Fast Electrical Modulation of Single Plasmonic Nano-Rod Resonance*; CLEO and Plasmonics 2023
23. *Plasmonics for sensing using currents and voltages*; Invited talk at Ben-Gurion University of the Negev 17.08.2023
24. *Potentials in plasmonics*; Invited at South Denmark University 25.05.2024 and at SFB 1636 @ Uni Potsdam 21.06.2024
25. *Nano-scale plasmonic Su-Schrieffer-Heeger chains*; ct.qmat24 – Dresden - 23.09.2024
26. *Quantum Properties of plasmonic surfaces*; Falling Walls Science Summit 3 min- pitch; 08.11.2024
27. Invited speaker: *Electrical modulation of plasmonic nano particle surfaces* CLEO/EQEC 2025 – Munich 27.06.2025

G. Scientific education

Courses:

"Moderne Physik 2" comprising molecular and solid state physics for future teachers – 24/25 and in the upcoming 25/26 term

Organizing the "Sommerschule Physik" in 2024 and 2025 for pupils from 10th to 13th grade and close interaction with the participants

Advanced Seminars in 23/24 and 24/25

One quarter of “Klassische Physik 2” 2nd semester physics course 2024 & 2025

1st semester course “Physics for human and dental medicine” 2022/23 and 2023/24

Head of the 3rd semester exercises to the course „Introduction into optics and quantum mechanics“ (German language, winter semester 2017-18 and 2018-19, Design of exercise sheets, solutions as well as exams)

Several lab-courses and exercise groups on the undergraduate level (Semester 1 - 4)

Exemplarily: Übungen Einführung in die Physik 2 SoSe 2010 und SoSe 2017, Blockpraktikum C1 Versuche 41, 42 und 45 im SoSe 2017, Blockpraktikum A im SoSe 2018

Phd student:

Luka Zurak: Light harvesting via the plasmo-electric effect (ongoing since July 2018; official supervisor: Prof. Bert Hecht);

Diploma / Master (full responsibility for project and supervision):

Markus Kiunke: „Evolutionäre Optimierung plasmonischer Nanostrukturen“

Oleg Selig: „Evolutionäre Algorithmen für plasmonische Nanoantennen - Von der Implementierung zur Messung“

Paul Mörk: „Fundamentals and Application of doubly resonant SERS Gratings“

Jakob Syndicus: „Resistive heating of single plasmonic resonators“

Summer/Erasmus students/DAAD internships (full responsibility for project and supervision):

Rago Salvatore: “Investigation of Nanostructures using atomic force microscopy”

Luka Zurak: “Kelvin-Probe Force Measurements on illuminated optical antennas”

Pooja Sutheshnan: “Resistive heating of Au Raman gratings for T-measurement of 4-MBA SAM”

Akhil Kottayil: “Quasi-normal mode calculations with COMSOL”

Bachelor (full responsibility for project and supervision):

Martin Baußenwein: „Nahfeldverstärkung dipolarer metallischer Nanoantennen mit rechteckigem Querschnitt in Abhängigkeit vom Einfallswinkel der optischen Anregung“

Florian Bauer: „Split-ring-antennas for incoupling into plasmonic waveguides“ (never finished)

Franziska Keilbach: “1D mode-matching for plasmonic resonators” (ended)

Sophia von der Bey: “Herstellung von mikrofluidischen Kanälen aus PDMS für Raman-Messungen an plasmonischen Nanostrukturen”

Lorenz Löffler: “Semi-analytical modeling of one-dimensional plasmonic resonators”

Tim Haßlauer: “Y-junctions in plasmonic slit-waveguides”

Daniel Schrainer “Raman Messungen an Chemotherapeutika in Silica-Gel-Fasern im Rahmen des Gliogel Projektes“
