Background
Companies increasingly realize that creating and sustaining a competitive edge requires them to think and act like entrepreneurs. Many companies, such as Google, 3M, or Bertelsmann, therefore equip selected employees with the space and resources to become intrapreneurs. Other companies see the spawning of corporate spin-offs as an integral part of their strategy or go ‘start-up shopping’ from time to time. This module is a theory-led and practice-oriented primer on corporate entrepreneurship. It provides you with knowledge useful for anyone aiming at working (or researching) in the field of corporate innovation and entrepreneurship or at pursuing an ‘intrapreneurial’ or entrepreneurial career.

On successful completion of this module you will be able to: (1) make judgements about the organizational and managerial implications of corporate entrepreneurship, (2) assess the role of corporate entrepreneurship for creating and sustaining competitive advantage, (3) systematically choose between different routes of action, and (4) create and evaluate corporate entrepreneurship concepts.
