

**Acknowledgement of and compliance with the Covid-19 infection control measures
for research work**

Research work:	
Chair/study course:	
Name:	Research period:

For the purpose of carrying out my research work, I hereby confirm that

- I am free of respiratory infection symptoms (cough, rhinitis, sore throat) as well as loss of smell and taste associated with fever ($\geq 38.0^{\circ}\text{C}$),
- I am not under officially ordered domestic quarantine and that
- I have not entered the Free State of Bavaria from a state outside the Federal Republic of Germany within the last 14 days, which is still subject to quarantine obligations (see daily updates under <https://www.stmgp.bayern.de/coronavirus/massnahmen/#CTT> the section “Ansteckungsgefahr durch Quarantänemaßnahmen für Einreisende eindämmen”)

In case of an entry from such a state, entering the university is prohibited until the domestic quarantine period has expired; in case of the symptoms described above, work must be stopped immediately and may only be continued after a negatively completed SARS-CoV-2 test.

I have taken note of and assure that the following regulations will be observed:

- 1.5 m minimum distance between workplaces, both in front of and behind as well as to the right and left of the workplaces
- compliance with cough and sneeze etiquette
- no physical contact
- regular hand-washing
- avoidance of touching the face with my hands
- a mouth-nose cover (MNC) should be worn, wherever possible
- leaving the laboratory area immediately after completion of the experiments, switching off apparatuses unless they are in continuous operation

Violation of these regulations and disregard of instructions from the respective research team leader can lead to exclusion from the research work.

To be signed at the beginning of the research work:
