

Sorting work

Inv.-No.	01342
Developer	Fritz Giese (1890-1935)
Manufacturer	Heinrich Diel; Leipzig
Date	about 1950
Material	Wood, Metal coated
Dimensions (h ,w, d; in mm)	80, 230, 250

Sorting tasks were already used by Alfred Binet (1857-1911) or Walther Poppelreuter (1886-1939) with buttons for example. Fritz Giese instead preferred geometric objects without any use for his sorting tasks. The subjects had to sort the different objects into the box. The task is far more difficult than it first appears and it is therefore often underestimated.
