FORUM

Translational Medicine

The new sequence of events of the series "FORUM" highlights challenges and perspectives of the translation process of biomedical research and clinical development in the era of precision medicine.

The **FORUM Translational Medicine** presents an outstanding panel of speakers from universities, clinics, spin-offs and Biotech/Pharma industries. These experts will provide a comprehensive overview on the use of the most promising state-of-the-art technologies, such as gene editing and stem cell therapy, in a broad spectrum of medical indications.

Do not miss this event!

Conference Reception

November 28, 2018, 6.00 pm
