

Würzburg GK 520 'Immunmodulation' Winter Semester 2006-2007 Programme

Cellular and Molecular Immunology 5th Edition (Updated) by AK Abbas and AH Lichtman

Chapter 3 Antibodies and Antigens	19 October 2006	Dr I. Berberich
Features of Antigen Recognizing Molecules of the Immune System Table3-1 p44 Natural Distribution and Production of Antibodies p44 Molecular Structure of Antibodies p45,47 NOT Box 3-1		Nicole Armbruster
General Features of Antibody Structure incl. Fig 3-1A & B p47-49 The Immunoglobulin Superfamily Box 3.2 p50-51		Nicole Bock
Structural Features of Variable Regions and their Relationship to Antibody Binding p49, 51 Structural Features of Constant Regions and their Relationship to Effector Functions p51-55 Table 3-2		Christiane Hammerschmidt
Anti-Ig Antibodies: Allotypes and Idiotypes Box 3-3 p54 Associations between Heavy and Light Chains incl. Fig 3-7 p55-57		Anja Matuschek
Synthesis, Assembly and Expression of Ig Molecules p57-58 incl. Fig 3-8		Elisa Monzon-Casanova
Antibody Binding of Antigens p58-61		Khalid Muhammad
Structure-Function Relationships in Antibody Molecules p61-63		Stefan Saremba
Monoclonal Antibodies Box 3-1 p45-47		Johannes Schnitzer

Chapter 4 The Major Histocompatibility Complex	26 October 2006	Prof. Th. Herrmann
Discovery of the Mouse MHC p66-68 Identification and Nomenclature of MHC Genes in Mice Box 4-1 p67-68		Tessa van Alen
Discovery of the Human MHC incl Fig 4-3 p68-69 Properties of MHC Genes p69		Jan Diekmann
Structure of MHC Molecules p70-73		Yvonne Dombrowski
Binding of Peptides to MHC Molecules p73-76		Stefan Fischer
Genomic Organisation of the MHC incl. Fig 4-10 p76-78		Antje Kroner-Milsch
Expression of MHC Molecules p78-80		Ekaterina Nichiporuk

Chapter 5 Antigen Processing and Presentation to T Lymphocytes	2 November 2006	Prof H. Moll
Properties of Antigens Recognised by T Lymphocytes incl. Fig 5-1 p81-84		Arumugam Palanichamy
Discovery of Antigen Presenting Cells and Their Role in Immune Responses p84-85 Types of Antigen-Presenting Cells for CD4+ Helper T Lymphocytes p85-88		Edwin Patino-Gonzalez
Capture and Presentation of Protein Antigens In Vivo p88-90		Doris Schmidt
Presentation of Protein Antigens to CD8+ T Lymphocytes incl. Fig 5-7 p90-91		Tobias Schwarz
Cell Biology of Antigen Processing incl. Fig 5.8 & Fig 5.9 p90-93		Claudia Stühler
Processing of Endocytosed Antigens for Class II MHC-Associated Presentation p93-97		Denise Tischner
Processing of Cytosolic Antigens for Class I MHC-Associated Presentation p97-100		Andrea Welcker
Physiological Significance of MHC-Associated Antigen Presentation p100-103		Wen Chen

Chapter 6 Antigen Receptors and Accessory Molecules of T Lymphocytes	9 November 2006	Kirsty McPherson
Identification of the TCR Box 6-1 p107 Structure of the $\alpha\beta$ TCR incl. Table 6-2 p106-109		Arnab Nayak
Role of the $\alpha\beta$ TCR in the Recognition of MHC-Associated Peptide Antigen p109-110		Nicole Armbruster
CD3 and ζ proteins of the TCR Complex p110-113 $\gamma\delta$ TCR p113		Nicole Bock
Accessory Molecules of T cells incl. Table 6.3 p113-115		Christiane Hammerschmidt
CD4 and CD8: Coreceptors involved in MHC-Restricted T cell Activation p114-118		Anja Matuschek
CD8 and CTLA-4: Receptors that Regulate T cell Activation p118 Other Accessory Molecules with Signaling Functions:CD45, CD2 p118-119		Elisa Monzon-Casanova
Integrins incl. Box 6-2 p119-122		Khalid Muhammad
Selectins and Selectin Ligands incl. Box 6-3 p122-124		Stefan Sarembo

Chapter 7 Maturation, Activation and Regulation of T Lymphocytes	16 November 2006	Dr M. Topp
General Features of Lymphocyte Maturation p.129-135		Johannes Schnitzer
Formation of Functional Antigen Receptor Genes in B and T Lymphocytes p135-138		Tessa van Alen
Antigen Receptor Gene Recombination p138-141		Jan Diekmann
Generation of Diversity of the B and T cell Repertoires p143-146		Yvonne Dombrowski
Maturation of B Lymphocytes p146-151		Stefan Fischer
Maturation of T Lymphocytes p151-155		Antje Kroner-Milsch
Selection Processes in the Maturation of MHC-Restricted $\alpha\beta$ T cells p155-160		Ekaterina Nichiporuk

Chapter 8 Activation of T Lymphocytes	23 November 2006	Prof E. Serfling
General Features of T lymphocyte Activation p163-165		Arumugam Palanichamy
Methods for Studying T cell Activation Box 8-1 p166-167		Edwin Patino-Gonzalez
Functional Responses of T lymphocytes p165-169		Doris Schmidt
Role of Costimulators in T cell Activation incl. Box 8-2 p169-173		Tobias Schwarz
Signal Transduction by the TCR Complex p173-174 Early Membrane Events p174-180		Claudia Stühler
Ras-MAP Kinase Signaling Pathways in T lymphocytes p180-181 Calcium and PKC-Mediated Signaling Pathways in T lymphocytes p182-183		Denise Tischner
Activation of Transcription Factors that Regulate T cell Gene Expression p183-184 Biochemistry of Costimulation p184-187 Altered Peptide Ligands p187		Andrea Welcker

Chapter 9 B Cell Activation and Antibody Production	30 November 2006	Dr I Berberich
General Features of Humoral Immune Responses p189-191		Wen Chen
Antigen Recognition and Antigen-Induced B cell Activation incl. Box 9-1 p192-196		Arnab Nayak
Second Signals for B Cells provided by Complement Receptors p194-195 Functional Responses of B Cells to Antigen Recognition p196		Nicole Armbruster
Helper T cell-Dependent Antibody Responses to Protein Antigens p196-197 Early Events in T Cell-Dependent Antibody Responses p197-203		Nicole Bock
B Cell Differentiation into Antibody-Secreting Cells p203-204 Heavy Chain Isotype (Class) Switching p204-205		Christiane Hammerschmidt
Late Events in T cell-dependent Antibody Responses: Germinal Center Reactions p206-211		Anja Matuschek
Antibody Responses to T Cell-Independent Antigens p211-213 Antibody Feedback: Regulation of Humoral Immune Responses by Fc Receptors p213-214		Elisa Monzon-Casanova

Chapter 10 Immunologic Tolerance	7 December 2006	Dr J. Wischhusen
General Features and Mechanisms of Immunologic Tolerance p217-220		Khalid Muhammad
Central Tolerance in T cells p220-222 Peripheral T cell Tolerance – Anergy p222-225		Stefan Saremba
Peripheral T cell Tolerance – Deletion of T cells by Apoptotic Cell Death incl. Box 10-2 p225-231		Johannes Schnitzer
Peripheral T cell Tolerance – Tolerance Induced by Regulatory T Lymphocytes p231-232 Peripheral T cell Tolerance – Peripheral Tolerance in CD8+ T Lymphocytes p232 Peripheral T cell Tolerance – Factors that Determine the Tolerogenicity of Self-Antigens p232-233		Tessa van Alen
B Lymphocyte Tolerance p234-236		Jan Diekmann
Tolerance Induced by Foreign Antigens p235-237 Homeostasis in the Immune System: Termination of Normal Immune Responses p237-238		Doris Schmidt

Chapter 11 Cytokines	21 December 2006	Dr Th. Müller
General Properties of Cytokines p244-247		Stefan Fischer
Cytokines that Mediate and Regulate Innate Immunity –TNF p247-253		Antje Kroner-Milsch
IL -1, Chemokines, IL-12 p253-260		Ekaterina Nichiporuk
Type I Interferons, IL-10, Other Cytokines, p260-263		Arumugam Palanichamy
Roles of Cytokines in Innate Immunity and Inflammation p263-264		
Cytokines that Mediate and Regulate Adaptive Immunity – IL-2, IL-4 p264-268		Edwin Patino-Gonzalez
IL-5, IFN- γ , TGF- β , Other Cytokines of Adaptive Immunity p268-270		Yvonne Dombrowski
Cytokines that Stimulate Hematopoiesis p271-273		Tobias Schwarz

Chapter 12 Innate Immunity	14 December 2006	Prof Th. Herrmann
Features of Innate Immune Recognition p276-278		Claudia Stühler
Components of the Innate Immune System incl. Table 12-3 p277-279		
Epithelial Barriers p278-280		Denise Tischner
Phagocytes:Neutrophils and Macrophages p280		
Recruitment of Leukocytes to Sites of Infection p280-281		
Recognition of Microbes by Neutrophils and Macrophages incl. Box 12-1 p281-285		Andrea Welcker
Phagocytosis and Killing of Microbes p285,287-288		Wen Chen
Other Effector Functions of Activated Macrophages p288		
NK Cells p289-293 NOT Box 12-3		Arnab Nayak
Inhibitory and Activating Receptors of NK Cells Box 12-3 p291-292		Nicole Armbruster
The Complement System, Other Circulating Effector Proteins, Cytokines p293-294		Nicole Bock
Role of Innate Immunity in Local and Systemic Defense Against Microbes p294-295		
Role of Innate Immunity in Stimulating Adaptive Immune Responses p295-296		

Chapter 13 Effector Mechanisms of Cell-Mediated Immunity	11 January 2007	Prof T. Hünig
Types of Cell-Mediated Immune Reactions p298-300		Christiane Hammerschmidt
Development of Effector T Cells incl. Fig 13-3 p300-301 T Cell Antigen Recognition and Costimulation p300-303 Clonal Expansion of T cells p303		Anja Matuschek
Differentiation of Naive CD4+ T cells into Subsets of Effector Cells p303-306 Differentiation of Naive CD8+ T cells into CTLs p306		Elisa Monzon-Casanova
Migration of Effector T cells and other Leukocytes to Sites of Antigen p306-311		Khalid Muhammad
T Cell-Mediated Activation of Macrophages and Other Leukocytes p311-314		Stefan Saremba
Mechanisms of CTL-mediated Killing of Infected Cells p314-316		Johannes Schnitzer

Chapter 14 Effector Mechanisms of Humoral Immunity	18 January 2007	Dr I. Berberich
Overview of Humoral Immunity p318-320 Neutralization of Microbes and Microbial Toxins p320-321		Tessa van Alen
Antibody-Mediated Opsonization and Phagocytosis p321-326 NOT Box 14-1		Jan Diekmann
Leukocyte Fc Receptors Box14-1 p323-325		Yvonne Dombrowski
The Complement System, Pathways of Complement Activation p326-329		Stefan Fischer
The Alternative Pathway p329-331		Antje Kroner-Milsch
The Classical Pathway p331-332 The Lectin Pathway p332-333		Ekaterina Nichiporuk
Late Steps of Complement Activation p333-334 Receptors for Complement Proteins p333-336		Arumugam Palanichamy
Regulation of Complement Activation p336-338		Edwin Patino-Gonzalez
Functions of Complement p338-342		Tobias Schwarz
Functions of Antibodies at Special Anatomic Sites p342-343		Claudia Stühler

Chapter 15 Immunity to Microbes	25 January 2007	Dr U. Vogel
Immunity to Extracellular Bacteria p346-349		Jianqiang Li
Immunity to Intracellular Bacteria p349-355		Andrea Welcker
Bacterial Superantigens Box15-1 p350		Wen Chen
Immunity to <i>Mycobacterium tuberculosis</i> Box15-2 p354		Arnab Nayak
Immunity to Fungi p355		Nicole Armbruster
Immunity to Viruses p355-359		Nicole Bock
Immunity to Parasites p359-363		Christiane Hammerschmidt
Immunity to Malaria Box15-4 p361		Anja Matuschek
Strategies for Vaccine Development p363-365		

Chapter 16 Transplantation Immunology	8 February 2007	Dr C. Otto
Chapter 17 Immunity to Tumors		Dr J. Fensterle
The Immunology of Allogeneic Transplantation p371-377		Elisa Monzon-Casanova
Effector Mechanisms of Allograft Rejection p378-381		Khalid Muhammad
ABO and Rh Blood Group Antigens Box 16-2 p380		Stefan Saremba
Prevention and Treatment of Allograft Rejection p381-386		
Xenogeneic Transplantation p386		Johannes Schnitzer
Blood Transfusion p386-387		
Bone Marrow Transplantation p387-389		
General Features of Tumor Immunity p391-393		Tessa van Alen
Tumor Antigens p393-400		Jan Diekmann
Immune Responses to Tumors p400-402		Yvonne Dombrowski
Evasion of Immune Responses by Tumors p402-403		
Immunotherapy for Tumors p403-409		Stefan Fischer

Chapter 18 Diseases Caused by Immune Responses	1 February 2007	Prof R. Martini Dr A.Kerstan
Chapter 19 Immediate Hypersensitivity		
Chapter 20 Congenital and Acquired Immunodeficiencies		
Types of Hypersensitivity Diseases p411-412 Diseases Caused by Antibodies p413-417		Antje Kroner-Milsch
Diseases Caused by T Lymphocytes 419-424		Ekaterina Nichiporuk
Pathogenesis of Autoimmunity p424-425 Genetic Susceptibility to Autoimmunity p424-428		Arumugam Palanichamy
Role of Infections in Autoimmunity p428-430		Edwin Patino-Gonzalez
General Features of Immediate Hypersensitivity Reactions p432-434 Production of IgE p434-435 Binding of IgE to Mast Cells and Basophils p435-436		Arnab Nayak
Role of Mast Cells, Basophils and Eosinophils in Immediate Hypersensitivity p436-444		Tobias Schwarz
Reactions of Immediate Hypersensitivity p444-447 Genetic Susceptibility to Immediate Hypersensitivity p447 Allergic Diseases in Humans:Pathogenesis and Therapy p447-451 The Protective Roles of IgE- and Mast Cell-Mediated Immune Reactions p451		Claudia Stühler
Congenital (Primary) Immunodeficiencies p454 Defects in Lymphocyte Maturation p454-458		Jianqiang Li
Defects in Lymphocyte Activation and Function p458-460 Immunodeficiency Associated with Other Inherited Diseases p460-461 Defects in Innate Immunity p461-462 Therapeutic Approaches for Congenital Immunodeficiencies p462-463		Andrea Welcker
Acquired (Secondary) Immunodeficiencies p463-464 HIV and AIDS p464-475		Wen Chen
