

SPHINGOLIPIDS IN INFECTION 2022

International Symposium

20 – 22 September 2022 | Würzburg Germany

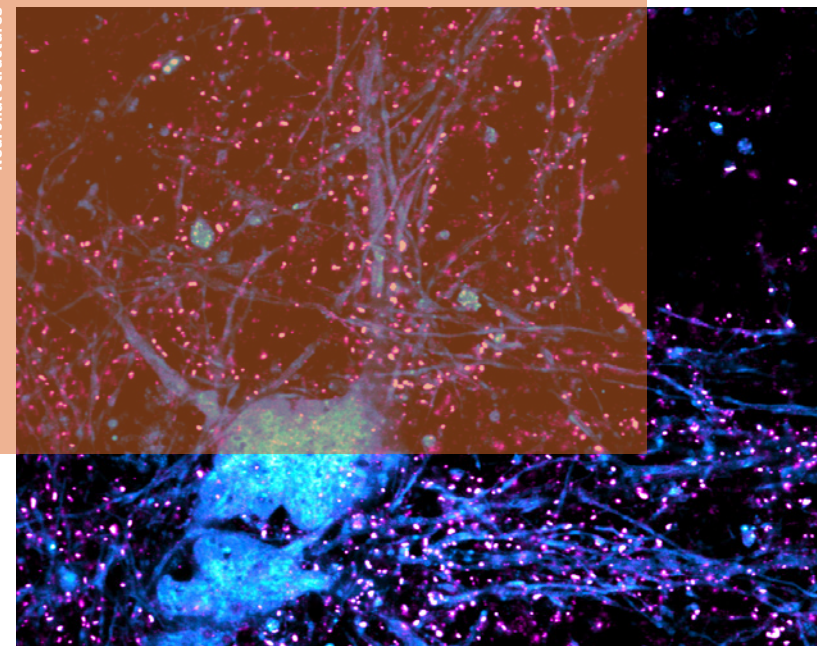

SPHINGOLIPIDS IN INFECTION 2022

Sphingolipids represent an important class of biomolecules that influence a wide range of biological functions. Implications of sphingolipids in diseases have garnered great attention in recent times and targeted intervention of sphingolipid turnover has proven to be a successful strategy in inflammation. However, its potential as a target in controlling infectious diseases at the level of metabolism and immune controls requires further definition. Incomplete elucidations of structure-to-function limit the ability to develop potent therapeutics. In order to address this limitation, a central platform for discussions and development of novel approaches through a multi-disciplinary effort is needed.

The international symposium “Sphingolipids in Infection 2022” is a forum dedicated especially to young scientists to establish network and career developments in the sphingolipid community through oral presentations and poster presentations. The goal of this symposium is to integrate scientists from diverse backgrounds to drive innovation towards sphingolipid-based research.

brochure and register now.**

Neuronal structures

- 6 Key Note Speaker
- 10 Abstract Speaker (Young Investigator)
- Poster Sessions
- Discussion Rounds
- Dinner at the historic wine cellar of the Unesco world heritage site Residence

PROGRAM SUMMARY

- Submission between **15 February – 30 June 2022**
- Submit your abstract on **our website** by clicking on this site 
- **Young Investigator speech or poster presentation**
you decide or let us decide
- Find **more information and instructions** on the
webpage

THE TUSCANY OF BAVARIA – A city surrounded by vineyards, Würzburg is among the warmest places in Bavaria. Würzburg is a city of ease with vibrant and safe neighbourhoods, magnificent old buildings and a great connection to metropolises like Munich and Frankfurt. Towards the end of World War II, Würzburg was almost completely obliterated in an air raid. And still there are enough of the old structures left to make the city one of the must-sees in Germany – thanks to the Residence (UNESCO World Cultural Heritage), the Cathedral, the Fortress Marienberg, the pilgrimage church of the “Käppele”, and also to the many historical university buildings and other sights.

Residence (UNESCO World Cultural Heritage)

Unesco world heritage site Residence

Pilgrimage church of the "Käppele"

Old Main bridge

Juliuspital Zehntscheune

Juliuspital Zehntscheune

- Historic "**Zehntscheune**" in traditional Franconian style
- Just **5 minutes walk** from main station
- **Quiet** and **central** location in the vibrant old town of Würzburg
- **Public parking garage** directly on the grounds
- **Fully accessible**
